Aerospace & Defence Manufacturing Show

Attaining self-reliance and indigenisation in defence sector has always been a priority for India and achieving the goal is important for not only strategic reasons but also economic ones considering the huge amount of money India could save by reducing defence imports.

With the government keen of advancing indigenisation through Atmanirbhar Bharat mission, there are a multitude of opportunities for Indian and foreign

defence companies to do well in the sector.

Aerospace and Defence Manufacturing Show (ADMS), which is a one-of-its-kind defence manufacture exhibition organised by Aeromag Asia in association with SIATI, has always shared the government's vision of transforming India into a defence manufacturing hub since its inception in 2014.

At a time when the industry is recovering from the impact of the pandemic, we

are hosting the seventh edition of the exhibition to showcase the strategic manufacturing capability of Indian companies and impart latest technologies.

ADMS aims at giving an umbrella platform for competent companies to display their products and capabilities before the right audience.

The event is supported by ISRO, DRDO, Defence Public sector companies including Hindustan Aeronautics Limited (HAL), BEML and Indian Armed Forces.

Who should attend

- Aerospace and defence Industries
- Ministry of Defence Personnel
- Vendors of all Defence PSUs
- Representatives of State Governments
- Armed Forces Personnel
- DRDO Officials
- DPSU Officials
- Technical Experts and Analysts
- OEMs
- Defence Contractors and Traders
- Academicians, Researchers and Aerospace Engineering Students
- Decision-Makers in Defence and Aerospace Arena

Focus areas

- Advanced Manufacturing Technologies
- Public - Private - Partnership for Aerospace & Defence Indigenization
- Indian Space Programmes – Opportunity for the Indian Industry
- DRDO's initiatives for partnership & successful collaborations with private Industry
- Technology Innovations in Aerospace Manufacturing
- High Productive Machines
- Additive Manufacturing
- Industry partnership
- Current and Future Needs of Navy
- Partnering with Design and Development projects of IAF
- Software Applications for Aerospace Manufacturing and Maintenance
- Govt. regulation with respect to outsourcing to SMEs and Complaints
- Growing Excellence in technology and facilities in Private sector
